Types of corrective actions

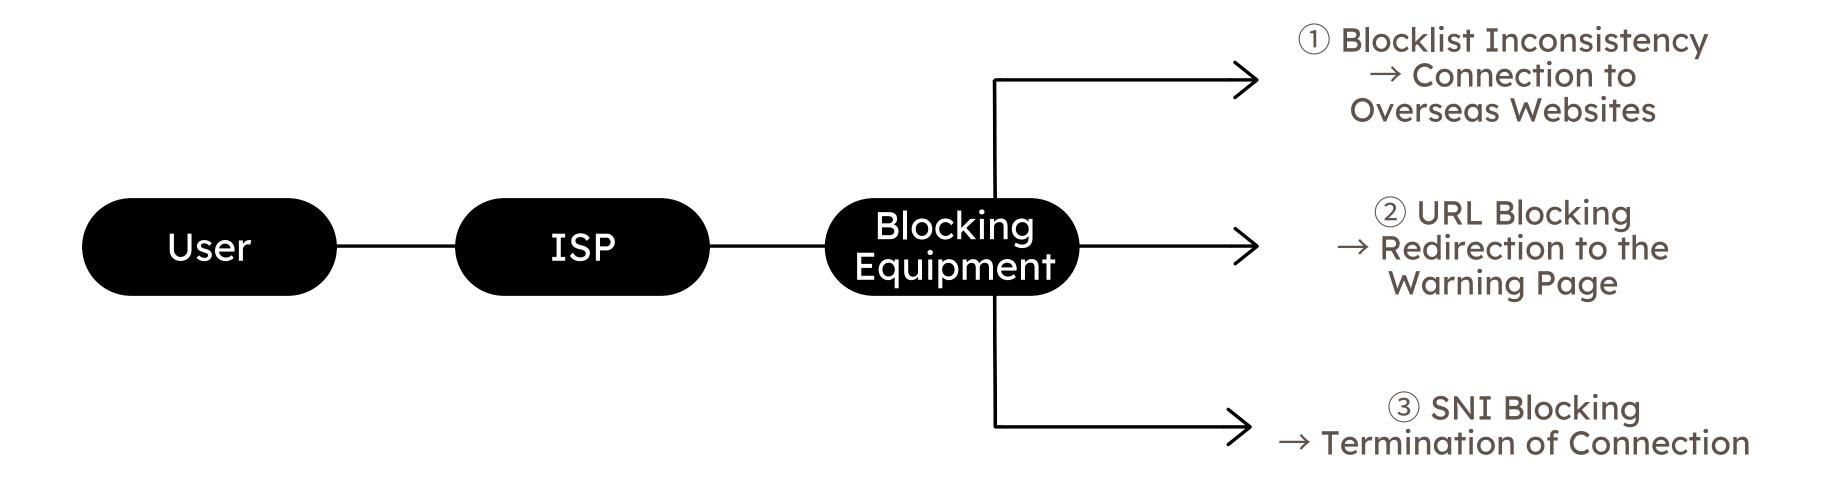

Standard Procedure for Access Blocking

Access Blocking Methods

Communication Domain File Protocol Name Format http://www.un.org/aboutun/index.html

Access Blocking Methods

URL Blocking
(HTTP Blocking Method)

- Applied to URLS using unencrypted HTTP protocol
- If the user-entered URL matches the DB of the blocking equipment, the user is redirected to the blocking notice page (warning.or.kr)
- Capable of blocking specific subpages

SNI Blocking (HTTPS Blocking Method)

- Applied to URLS using encrypted HTTPS protocol
- If the domain name exposed during the brief unencrypted session matches the blcoking DB, an error packet is issued to terminate the connection
- Unable to block specific subpages, only possible at the domain (including subdomains)

URL Blocking Method

Warning
